

Portable Electric Spa California ENERGY GUIDE

Manufacturer : Master Spas LLC. Model : 9600 Capacity (# of people) : 5	Rated Volume 270 US Gal
Standby Power* 168 Watts	
<div style="font-size: 2em; font-weight: bold; margin-bottom: 10px;">168 Watts</div> <p style="text-align: center;"> 50 W Average Standby Power Range 450 W of Spa Models </p>	
Maximum standby power allowed for this size spa under California Code of Regulations (CCR) Title 20, section 1605.3(g)(6)(B) and ANSI/APSP/ICC-14 2014: 196 Watts Total annual power consumption in standby mode* = 168 x Duty Cycle = 1472 kWh	
Annual Standby Energy Cost* = 1472 x Energy Rate (cost per kilowatt hour in your area)	
* Data is based on standard test procedure for Portable Electric Spas as stipulated in CCR Title 20, section 1604(g)(2)(B) and ANSI/APSP/ICC-14 2014. Note: This is the amount of power used at test conditions and does not include spa usage or extreme cold conditions. This data should be used only for comparison of spa models. Power is not monthly energy consumption. Duty cycle is estimated to be 8,760 hours per year.	
Based on testing with the spa manufacturer's specified cover checked below, the spa cover unit combination that yielded the highest normalized standby power. This spa must be sold with this cover or a manufacturer's approved equivalent that has also been tested with the unit per CCR Title 20, Section 1608(a). To view the energy performance of the other covers specified below in combination with this unit, visit the California Energy Commission's Modern Appliance Efficiency Database System (MAEDBS).
